

Bankhall Court - Glasgow

John Gilbert Architects - Cruden Buildings Limited

Project Information

Type of Building: 5 storey apartment block
Glazing System: System 1000
Quantity: 18 sunspaces & 1 double width roof terrace
Construction: The building is a traditional brick/concrete construction complete with a rendered/block finished external envelope. The Windoor system is constructed with a solid laminated coloured aluminium plate infill and has sliding and folding opening glass in the upper section. The roof terrace is constructed to match the sunspaces below with a balustrade up to 1100mm.
Completion Date: 2010
