

Linkwood Crescent - Glasgow

Burnet Bell Architects - Glasgow Housing Association

Project Information

Type of Building: 19 and 17-storey refurbished tenement blocks
Glazing System: Windoor System 1000 Silhouette
Quantity: 180 enclosed balconies
Construction: Fitted to the existing concrete slabs on the East & West elevations, the enclosed balconies span vertically from floor to floor without the need of additional structure. The slim framed sliding, folding & opening system features powder coated aluminium frames and toughened safety glass panels, which turn 90° inwards against the wall. The balcony glazing can be fully enclosed, partially or fully opened. There are locks on the first opening panel for security. Solid powder coated aluminium panels completely cover the existing concrete balustrade.

Completion Date: 2012
